JOHN WILLIAM R. TEOXON

Software Engineer | Full-Stack & Game Developer | Automation Systems | AI & ML Specialist

github.com/Yuezhiui

EDUCATION

Institute of Creative Computer Technology (ICCT Colleges) **Cainta, Rizal**
Bachelor of Science in Computer Engineering (CpE)

EXPERIENCE

Confidential Japanese Software & Game Company **2026 – Present**
Junior Software & Game Developer | Chiba, Japan (Remote)

- Contribute to production software and game-system integration within a remote, cross-cultural engineering team.
- Support gameplay systems, live-service reliability, and performance tuning under rigorous quality standards.

Kyu's Studio **2026 – Present**
Founder & Lead Developer

- Founded an independent studio building intelligent desktop, browser, and cross-application automation tools.
- Lead Ophelia's architecture, automation logic, user experience, and ongoing product development.

超越你的梦想 Studio **2025 – 2026**
Senior Developer, Scripter & Environment Artist

- Engineered gameplay mechanics, interactive systems, and scripts for indie and AA game projects.
- Designed immersive 3D worlds and optimized scenes for visual fidelity and reliable frame rates.

TACO Studio **2024 – 2025**
Senior Developer, Scripter & Environment Artist

- Led gameplay programming from prototype to polish, including core loops and physics interactions.
- Created stylized game levels through greyboxing, asset placement, and lighting optimization.

PROJECTS

Ophelia Automation
Desktop Automation • Browser Workflows • Cross-Application Systems

- Architected Ophelia to automate repetitive desktop tasks, browser workflows, and cross-application processes.
- Designed modular automation logic for coordinating multi-step processes and connected workflows.
- Led core application engineering, interface design, integration, and iterative product improvements.

Aphanes Windows
C# • WinUI 3 • .NET 8 • Windows App SDK

- Built a native Windows network-adapter utility for MAC address management and scheduled rotation.
- Added adapter detection, timed rotation, and connection-recovery safeguards.
- Implemented address generation, default restoration, and optional network-cache cleanup.

Retro Photo Card
React • Vite • IndexedDB • Browser APIs

- Built a private, browser-only photo editor for film-style cards, postcards, and contact sheets.
- Implemented non-destructive photo adjustments, film effects, interactive reframing, and PNG exports.
- Added IndexedDB project storage, reusable film recipes, and portable import/export.

Selected Projects

- Aphanes Mobile — mobile project in the Aphanes series.
- Techne — 2D sprite-generation and animation-atlas tooling.
- Kilos Grammar — grammar-focused software project.

TECHNICAL SKILLS

Languages: C++, C#, Rust, Python, Java, JavaScript, HTML, CSS
Application Development: React, Tailwind CSS, Avalonia, .NET Framework, JavaFX, Node.js, Java Spring
Cloud & Platforms: Vercel, Supabase, Firebase
Game, Design & Art: Godot, Blender, Cascadeur, Photoshop, After Effects
Developer Tools: Antigravity, Claude Code, Codex
